From the Audit Desk:

If you are utilizing GPS to support your quarterly filing you need to make sure that you have access to the raw data from the system for the IFTA and or IRP retention period of 5 years. If you don't have access to it that long from the vendor you are using you will need to download that data and retain it in your records in the event that your account get selected for audit. Failure to retain miles records will result in adjustments and additional taxes and IRP registration fees due. If you have questions reach out to our audit section.
