

VICTORY

In The Making - Nebraska DMV

August 2018

Ready for Change

Nebraska DMV is gearing up for big changes on October 15, 2019. The current VTR system has been faithfully working for the last 26 years, but is no longer able to support the growing requirements for Nebraska residents, businesses, and stakeholders. After considering various industry solutions, Fast Enterprises, LLC. (FAST) was selected to implement its FastVS solution, known locally as VicToRy, to replace the current VTR system. They were chosen for their successful collaboration with other state DMVs and their reputation for being on time and on budget. The VicToRy project is a joint effort between the DMV, County Treasurer Offices, FAST, and the Office of the Chief Information Officer (OCIO).

A major benefit to implementing VicToRy will be the use of a shared database, where all counties can access customer records and will no longer be siloed from each other. VicToRy will also assist in proper tax and fee collection, fraud detection, and consistency between all Motor Vehicle offices. Additional benefits and changes will be shared in the coming months and during next year's training.

Be sure to mark your calendars, VicToRy's official launch date is October 15, 2019!

Upcoming Events

Job Shadows

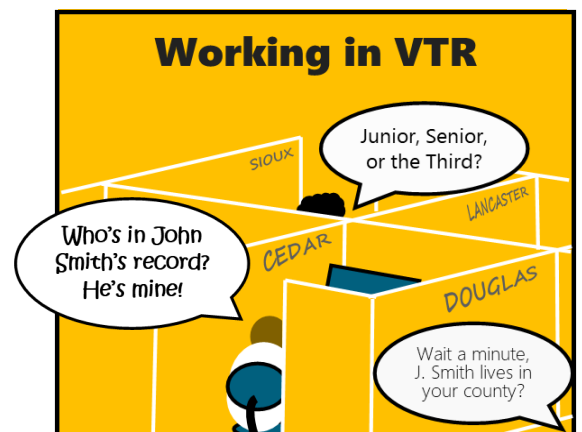

May - September, 2018

District Meetings

Sept 20 - Oct 15, 2018

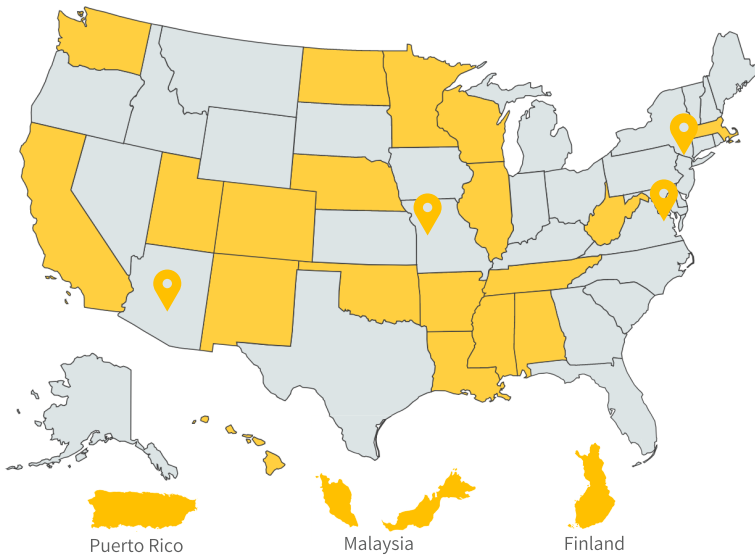

System Verification

Oct 15 - Oct 26, 2018

Little did they know that soon everyone, everywhere could see everything at the same time... depending on security.

— VicToRy in the Making —

■ Locations where Nebraska FASTies have worked on various FAST software projects, such as Tax and Vehicle Services.

Fast Enterprises, LLC. has been in the business of helping government agencies better serve their communities for 21 years. The FastVS solution, VicToRy, is an integrated, commercial off-the-shelf (COTS) software solution that is designed to streamline business processes and improve efficiencies within the realm of motor vehicles. Beginning in March 2018, project VicToRy has grown to include 30 FAST employees (FASTies) who moved to Lincoln, Nebraska.

The majority of FAST's employees have worked on multiple projects, as highlighted on the map above. In fact, project VicToRy's very own Rory Steen has worked on nine different projects! From California to New York, Puerto Rico to Malaysia, Nebraska FASTies love to explore new places. The whole project is excited to learn more about their Lincoln home, and everyone is looking forward to their first Husker season!

Meet the Team: Fast Enterprises

During the upcoming months, VicToRy will go through several phases of testing before Go Live on October 15th, 2019. To prepare for Business Testing, the VicToRy project has the support of 5+ DMV and county Subject Matter Experts (SMEs). Together they have decades of vast experience representing multiple departments and they work together to contribute their knowledge and know-how. For one hour each week, the SMEs meet with each other and the FAST Testing Coordinators during what has been dubbed the SME Stampede. Over the course of the Stampedes, the SMEs will provide their expertise to review processes, identify and write test scenarios, and offer support to each other during the scenario writing stage of the project.
