Tip of the Day

Inventory Restock numbers are currently under review. In the meantime, don't forget to order what you need. No one wants to run out of standard inventory.

Evolution of a User

That's right! Each day you are closer and closer to becoming a Super User. Welcome to the VicToRy League!

— VicToRy in the Making —

NACO of 2019

Last month at the NACO conference, we had the opportunity to discuss some of the changes coming down the pipeline, such as the commission changes, renewing dealers, and county holds.

On top of that, there was some exciting news.

Congratulations to Barb Swanson for being named County Official of the Year! Thank you, Barb and all our County Officials, for pulling off another great year.

A Fresh Look at Fleets

At this point, many of you are aware that a fleet in VicToRy refers to a group of vehicles owned by a business customer. This makes renewing these vehicles a breeze. But what if you or a fleet business customer has questions?

Quick, to the Help manager! Yep, I said it. If you check out the help topic titled "Fleets," you'll find a great description that can be used to answer questions for you or your customers. And remember, you can start adding vehicles to approved fleet accounts anytime (see "Manage a Fleet Account" in the Help manager). It's up to the customer if they want to renew online or in office. So feel free to start adding those vehicles now.

The Latest & Greatest

A VicToRy sync pack is on the horizon, and the project team is in the early stages of enhancing the system. A sync pack is essentially a minor upgrade to the existing version of VicToRy. Based on feedback and new system capabilities, some beneficial improvements are coming in March 2020 that will smooth out the user's experience. Stay tuned for sync pack correspondence and additional information from the VicToRy project team.

Meet the Team

Throughout the project, we've been introducing various team members who have been hard at work, making VicToRy work for you. Due to their start dates, some of the new guys never got their moment to shine. But no longer.

Introducing the New Guys: these folks have been granting security access, answering email questions, and keeping the VicToRy project supplied and hydrated, among many other tasks. This project is incredibly thankful for the contributions of these fabulous team members.

Jonathan Emeigh

Question: What has been the biggest challenge you've faced on this project?

Answer: Wrapping my head around revenue, tax distributions, general financial issues, and how all of that is handled differently across jurisdictions.

Question: What experience do you have working with the DMV?

Answer: I have been with the DMV for little over a year now, with the majority of my time spent working on the VicToRy project. In my experience, everyone is willing to share their knowledge, and share the burden on large tasks.

Tara Nelson

Question: What VicToRy feature or functionality are you most excited about?

Answer: I am excited to see the DMV embracing an updated software. As technology advances, it gives me a lot of comfort to see my State taking steps to ensure security and functionality for our citizens.

Question: What is your favorite thing about living in Nebraska?

Answer: It's cheesy, but Nebraskans are my favorite thing about Nebraska. During this project, slightly wary FASTies arrived from numerous locations. Now they give Nebraska raving reviews, and have intentions to visit again. Thank you, to all of you, for making them feel so welcome and showing them what Nebraska has to offer.

Evan Smith

Question: What VicToRy feature or functionality are you most excited about?

Answer: The system is fluid, fast and easy to update.

Question: What has been your biggest project accomplishment?

Answer: Streamlining some of the specialty plate email notifications that are sent to customers.

Eric Van Asperen

Question: Please list one fun fact about yourself.

Answer: I've watched movies in theaters in all 48 states of the contiguous United States.

Question: What has been your biggest project accomplishment?

Answer: Probably finishing the Tier II manager. I had a lot of help, but it was by far the largest and most complex part of the project that I was involved in.

Bite Size Reminders

Did you know you can customize, invert, outline, and sort column headers in almost every list? You can even hide or arrange them. Look at the "Lists" help topic in the Help manager for more info.

VicToRy is already calculating the sales tax commission changes which you will see when doing January's end of month reconciliation.

TODs can be added to all motor vehicles except for boats, snowmobiles, off-road vehicles and trailers. Basically, if an NMVTIS inquiry runs, then a TOD can be added.
